About Me

As a third-year software engineering student, I possess a good foundation in software development and a genuine passion for technology. My motivation and forward-thinking attitude drive me to seek an end-of-studies internship to further my educational journey. With a combination of academic knowledge and practical experience, I am confident in my ability to make a meaningful contribution and have a positive impact in the field of software engineering.

Projects

2023
End of year project (PFA)
E-commerce web application
Designed and developed an e-commerce web application for a watch store, utilizing HTML, CSS, JavaScript, Bootstrap, and SQL for robust functionality and user experience.

2022
Acadamic project
Socio Cultural project
An acadamic social project in wich we collected funds and extended a helping hand to our community, making a positive impact on the lives of those in need.

Experience

Juin –Sep 2023
Summer internship at Caustaza Group LTD
Developed a web application using React.js and Django to facilitate team communication and project management, ensuring seamless client project tracking.
