Ala Missaoui

Final-Year Software Engineering Student | Full-Stack Development Specialist

Passionate about crafting exceptional digital experiences through design, development, and mobile technology. Currently honing skills in responsive full-stack web applications to deliver top-quality software solutions. Actively seeking an internship opportunity for my end-of-studies project as a final-year Software Engineering student.

SKILLS

ReactJS

working with linux

git/github

Javascript   Nodejs

Express Js

react native

Problem Solving

css tailwind

Bootstrap

INTERESTS

Problem solving

Web developement and turning ideao into projects

JavaScript Frameworks

EDUCATION

Software engineering and information systems
Faculty of Science Monastir

06/2021 - 202   *Monastir*
Liscence
- Software engineering and information systems

CERTIFICATES

Javascript (01/2022 - 01/2022)
Data Structures: Stacks, Queues, Trees, Linked Lists, Graphs, HashMaps

Front-End: React, React-Bootstrap, React Router, Redux (04/2022 - 06/2022)
React with functional components & hooksReact routerReact-Bootstrap and state managementRedux for global state management

MongoDB (05/2022 - 06/2022)

Back-End Apps with Node.js and Express (08/2022 - 09/2022)
Express.js for server Mongo database and Mongoose JWT authentication with HTTP-Only cookiesCustom authentication middlewareCustom error handling

React Native (08/2023 - 09/2024)

PERSONAL PROJECTS

E-commerce Platform Development (01/2023 - 02/2023)
- Express.js for server development
- MongoDB database and Mongoose ODM
- JWT authentication with HTTP-Only cookies
- Custom authentication middleware
- URL : https://e-commerce-8bn6.onrender.com/

Fitness App (04/2023 - 05/2023)
- User (UX) Design
- Security and Authentication
- Track user's calorie intake
- URL : https://project.alamissaoui1.repl.co

Portfolio (01/2023 - 01/2023)
- My sample portfolio showcases information about me, provides contact details, and features my projects, which can be found at the following URL: https://www.alamissaoui.me

Weather App (02/2023 - 02/2023)
- Create a basic weather application that allows users to check the current weather for a specific location. This project will utilize the Express.js framework for building a server and Axios for making API requests to a weather data provider (e.g., OpenWeatherMap API).
